

## IT'S THE END OF THE WORLD BUT IT'S ALSO OK

We have learned that 2016 was the hottest year on record, just as 2015 was before that, and 2014 was before that. There's that. And also, there seems to be a popular trend of electing world leaders determined to see the world turn into an actual pile of shit. Like so -> 🤡

But we're not worried, are you worried? We're not worried. We're fine, thanks. We have in fact decided that though the world is ending, it's okay - because art. And here we are to clear the mind with some serenity.

Erica Scheper - Spathiphyllum (🕊)

Besides that we thoroughly enjoy the sober colours and clean composition of this particular painting by [Erica Scheper](#), it also serves as a great reminder of endurance. Because as anyone who's ever met a spathiphyllum knows, these plants cannot care less. They seem to adapt to any kind of situation. So despite your plant-hating ass and my green fingers of death - the spathiphyllum will not die.

Relevant fun fact: The common name for the spathiphyllum is Peace Lily.
